

Hearts in textile. Minds on machinery.

The Textile Machinery Association of Sweden

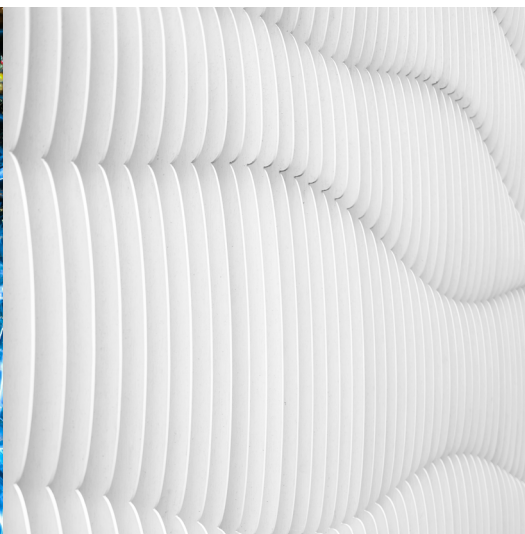

tmas.se

A Fast-Changing World

The global textile and garment industry is in transformation: dramatic changes are setting demands on companies across the spectrum of production and manufacturing. Customers are looking for complete, intelligent systems and efficient processes to maximize flexibility, minimize downtime and deliver to the highest quality and sustainability standards. An investment in machines, solutions and technology from a member of the Textile Machinery Association of Sweden ensures the most reliable solutions in all areas of the industry.

This is TMAS

TMAS, the Textile Machine Association of Sweden, has eleven members, and was founded in 1997. Each member is at the forefront of their own specific segment, with a long and successful history and a passion for textile manufacturing. TMAS initiates and coordinates joint activities, such as:

- networking at meetings and events designed to provide business opportunities
- providing support at major international exhibitions and events
- distributing market information and research material
- serving as a platform for the exchange of ideas and experiences
- collaborating with schools and universities to foster R&D and secure future competence

Swedish Success Factor

Sweden has an excellent international reputation for quality and reliability. The country is widely acclaimed as a leading technology and innovation hub. It is in our DNA to drive digitalization, automatization and sustainability, which are key drivers for the textile industry of the future. Swedish norms and regulations also place high demands on machines and systems being environmentally friendly. This ranges from sustainable work spaces, to production processes, to governmental regulations on waste material.

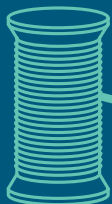

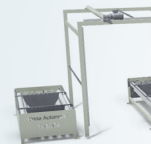

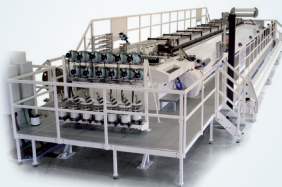

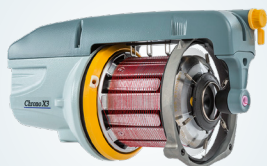

hearts
& minds

TMAS members are a passionate and driven group of leading Swedish companies within textile technology, automation and production processes. We are people tightly woven together by a common passion. We are driven by our love for textile, and our dedication to providing the most creative machinery solutions for the global textile industry.

TMAS. From Thread to T-shirts and Technical Textiles ...

Eltex of Sweden AB

Eltex is a leading company in weft and yarn supervision. The core activity is to develop yarn break sensors and tension monitors together with OEM customers. www.eltex.se

IRO AB

IRO is the market leader in the development and production of yarn feeding equipment, manufacturing and supplying a comprehensive range of yarn feeders and accessories for the textile industry.

www.iroab.com

TEXO AB

TEXO is one of the world-leading manufacturers of weaving looms for production of Paper Machine Clothing and Industrial Technical Fabrics.

www.texto.se

Svegea of Sweden AB

Svegea offers the most complete line of Collaretti cutters, Slitting machines and Bias Cutting range. The machines are world renowned for their ability to produce the highest quality trim at top speeds.

www.svegea.se

ACG Nyström AB

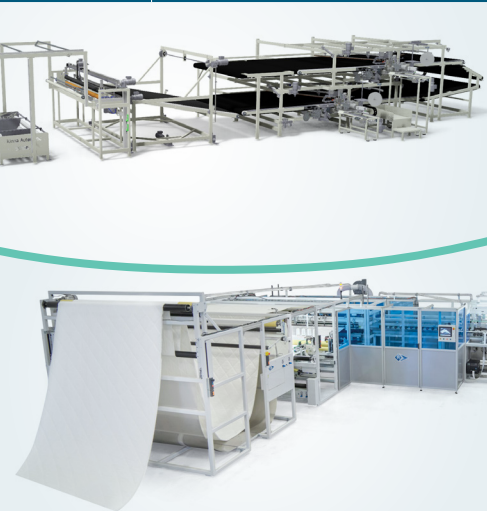

We offer solutions within cutting, sewing, embroidery, garment printing and product life management for textile products. The product range extends from the simplest needle to large complex machines for industry.

www.acgnystrom.se

ACG Kinna Automatic AB

We are a leading manufacturer of textile machinery for fully automated production lines for quilts, pillows and bed sets. From fabrics to finished packed product.

www.kinnaautomatic.se

Baldwin Jimek AB

Baldwin Technology Company Inc. is a leading global manufacturer and supplier of innovative process-automation equipment, parts, service and consumables for the printing, packaging, textile, plastic film extrusion and corrugated industries.

www.baldwintech.com

Coloreel AB

Coloreel is a Swedish technology innovation company. They offer a technology that enables instant thread coloring during production, opening up amazing possibilities. Today it is used for industrial embroidery machines, but in the future, it will also be used for sewing, knitting, weaving and more.

www.coloreel.com

ES Automatex Solutions AB

We specialize in automated machines for the home textile industry. We promote new machines from our partner Automatex Inc. in Canada for this industry segment.

www.esautomatex.com

imogo AB

Sustainable textile dyeing. imogo's FlexDyer® is a unique concept that drastically reduces water, chemistry and energy use in the dyeing process.

www.imogotech.com

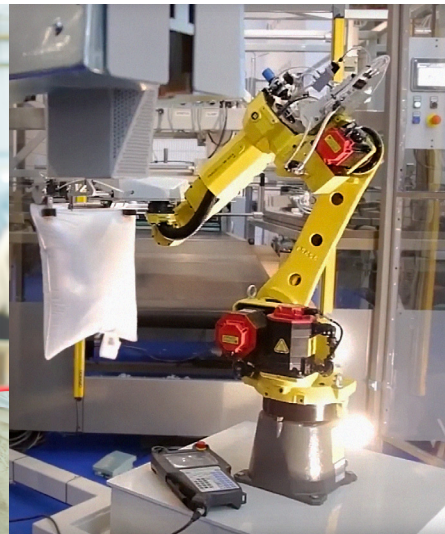

Eton Systems AB

Eton Systems provides material handling systems consisting of individually addressable product carriers, automatically finding their way to the correct operation.

Our Promise to You

In today's factories and production plants, automation is the key driver and sustainability is an absolute priority. TMAS members have the experience and knowledge to deliver exceptionally well to these demands. We know that flexibility is essential, and that the ability for fast response to your customers' demands is critical for you. The vision for TMAS companies is to be part of the textile production supply chain of the future. We will achieve this by upholding the promises we make to our customers:

Innovation

We invest our resources in R&D to drive innovation.

Dedication

We are dedicated to solving our customers' needs.

Quality

Quality is essential to everything we do and deliver.

Passion

Our passion drives us to find new and exciting technologies for our customers.

Membership has Benefits

As global textile industry suppliers, TMAS companies have a reputation for flexibility, accountability and building long-term customer relationships. On top of this, TMAS is a member of CEMATEX (The European Committee of Textile Machinery Manufacturers). Our membership facilitates networking and cooperation and an opportunity

for taking the lead in creating a "World Forum of Textile Technology". It also ensures clear and open communication with the EU and other official bodies. CEMATEX is the owner of ITMA, the world's largest international textile machinery exhibition.

We are a strong collection of highly dedicated companies. Each individual member is at the forefront of their own specific segment. We each bring with us a long, successful history of innovation and a passion for textile manufacturing. Together we deliver effective, top quality technology systems and solutions to textile producing customers around the world.

We are here to future proof your textile production. Get to know us better at:
